GET <http://localhost:3000/api/clientes/>

<http://localhost:3000/api/clientes/>

This API endpoint makes an HTTP GET request to retrieve information about a specific client. The request should be made to

<http://localhost:3000/api/clientes/65d6a9a633699defe86b096a>.

Response

Upon a successful request, the server will respond with a status code of 200 and a JSON object containing the retrieved client information. The response will include the following fields:

- `_id` (string): The client's unique identifier.
- `cedula` (number): The client's identification number.
- `nombres` (string): The client's first name.
- `apellidos` (string): The client's last name.
- `direccion` (string): The client's address.
- `codigo_ciudad` (number): The city code for the client's location.
- `telefono` (number): The client's phone number.
- `correo` (string): The client's email address.
- `tipo_usuario` (string): The type of user.
- `contrasena` (string): The client's password.
- `tipo_de_caso` (string): The type of case.
- `valor_pretensiones` (string): The value of the client's claim.
- `tiene_contrato` (string): Indicates if the client has a contract.
- `honorarios` (string): The client's fees.
- `forma_de_pago` (string): The payment method.
- `__v` (number): Version key.
